### [STORAGE AND STABILITY]

Storage: Avoid repeated freeze/thaw cycles.

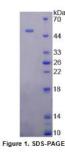

Store at 2-8<sub>o</sub>C for one month.

Aliquot and store at -80°C for 12 months.

**Stability Test:** The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37<sub>°</sub>C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.
