YBB349Hu01 50 μ g

Recombinant Adenylyl Cyclase Associated Protein 1 (CAP1)

Organism Species: Homo sapiens (Human)

*Instruction
manual*

FOR IN VITRO USE AND RESEARCH USE ONLY
NOT FOR USE IN CLINICAL DIAGNOSTIC PROCEDURES

10th Edition (Revised in Jan, 2014)

[PROPERTIES]

Residues: Ala38~Lys149

Tags: N-terminal His-Tag

Accession: Q01518

Host: *E. coli*

Subcellular Location: Cell membrane;

Peripheral membrane protein.

Purity: >95%

Endotoxin Level: <1.0EU per 1 μ g

(determined by the LAL method).

Formulation: Supplied as lyophilized form in 20mM Tris

150mM NaCl, pH8.0, containing 1mM EDTA, 1mM DTT,

0.01% sarcosyl, 5% trehalose, and preservative.

Predicted isoelectric point: 6.8

Predicted Molecular Mass: 13.6kDa

Applications: SDS-PAGE; WB; ELISA; IP.

(May be suitable for use in other assays to be determined by the end user.)

[USAGE]

Reconstitute in sterile ddH₂O.

[STORAGE AND STABILITY]

Storage: Avoid repeated freeze/thaw cycles.

Store at 2-8°C for one month.

Aliquot and store at -80°C for 12 months.

Stability Test: The thermal stability is described by the loss rate of the target protein. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. (Referring from China Biological Products Standard, which was calculated by the Arrhenius equation.) The loss of this protein is less than 5% within the expiration date under appropriate storage condition.

[SEQUENCES]

The target protein is fused with N-terminal His-Tag, its sequence is listed below.

AG A AP Y V Q A F D S L LA G P VA E Y L K IS K E I G G D V Q KH A E M V H T G L KL E R A L LV TA
